eLibsys

eLibsys (Complete Library Management System) is a powerful, flexible and easy to use for library .eLibsys is a software developed by the librarians and for the librarians.It offers many flexible and convenient features, allowing librarians and library users to maximize time and efficiency. On a networked system, this library software can enable users to save their time and also automate several processes.

eLibsys is capable of managing book issues, returns, magazine/newspaper subscriptions, book binding, periodical/journal bindings, calculating/managing fine, special search options, generating various reports for record-keeping and review purposes according to end user requirements.eLibsys also provide that reports which is the require at the time of NAC inspection.

More over this software is fully compatible with bar code. Use of bar codes for library management eases the everyday tasks of big libraries, where the number of transactions exceed several thousands in number. The bar code generation and printing process is a built-in feature of this software.

The eLibsys Network Version gives you inexpensive multiple-user power. On a network system, all users can edit and search the same database at the same time, maintain catalog of books, articles, recordings, corporate documents or patents.

Features

eLibsys provide you tremendous features are as follows: -

Printing (Bar Code and Label)

- Catalog Printing:
- Bar code Bar code

OPAC (Online Public Access Catalogue)

This feature can be used by students to search books with various options according to accession number, by author, subject, language, title etc. or by status with proper Amirah and even rack no. also.
